1 Introduction

This document outlines the procedure for the procurement of equipment and consumables by teams for the Mechatronics 424 team project. Teams must follow this procedure to ensure that the project complies with Stellenbosch University's financial and procurement policies, and to lighten the burden on administrative staff within the department and university.

2 Project budget

The total expenses incurred by teams for the project must not exceed the budget specified in the project brief, unless special permission is granted by the project facilitators. Teams must also maintain a spreadsheet of their purchases, to be included in the project report.

3 Procedure

The following subsections describe the sequence of steps that teams must follow for procuring equipment and consumables for their project.

3.1 Quotations from registered vendors

Teams are only allowed to purchase from vendors that are registered with Stellenbosch University. A list of frequently used, local vendors is provided in Appendix A, while a full list of registered vendors will be made available on SUNLearn.

Quotations must be obtained from these vendors for all equipment and consumables to be purchased for the project. Quotations can be obtained from the vendor directly, via email or via the vendor's online retail site¹. For online retail sites, a screenshot/printout of the shopping basket at checkout can be provided as a quotation.

3.2 Submission of quotations

Teams must submit their quotations to Mrs Meyer (merentia@sun.ac.za) via email, with the email subject line "**Mech424 Project Team *number***". The quotations can be sent any time, but will only be processed on Mondays and Fridays, 13:00-15:00. This means that quotations submitted on a Monday after 13:00 will only be processed on the next Friday.

3.3 Collection with purchase orders

Following the processing of the quotations, a purchase order will be sent to teams (i.e. on Monday and Friday afternoons). These purchase orders can be provided to vendors as the proof of purchase and the order can be collected/shipped/delivered. Should any issues arise with the collection of purchases, please contact Mrs Meyer for assistance.

¹ Please be sure that the quotation obtained from the online store pertains to the local store, e.g. regarding the availability of stock.

4 Summary

For the Mechatronics 424 team project, teams have an allocated budget to procure equipment and consumables for the construction of their system. Procurement can only be done from vendors registered with Stellenbosch University. The procedure is as follows:

- Teams must obtain quotations from the vendors for their intended purchase.
- Teams must submit these quotations via email to the Department of Mechanical and Mechatronic Engineering.
- Teams will receive a purchase order for the submitted quotations.
- Teams can use the purchase orders to collect the purchase from the vendors.

Appendix A: List of frequently used, local vendors

- Microrobotics (Stellenbosch (Techopark))
- Builders Express (Stellenbosch)
- Agrimark (Stellenbosch)
- Oranjeblanjelou (Stellenbosch)
- Communica (Paarden Eiland)
